

Quarterly Regional Report – May to August 2019

Regional Health and Safety Committee

The committee's priority for the months of May and June was to primarily focus on committee members' Health and Safety issues at their work place as a prelude to the summer months of July and August where all the members took a 2 month well deserved break.

July found the committee's executive joining for an evening of brainstorming to outline the Committee's Fall and Spring 2020 priorities. A number of ongoing and new properties have been set and will be communicated in the coming months.

One of the committee's on-going challenges and priorities is to expand its membership to the point where the majority of the components and DCLs, in the National Capital Region, are represented on our Regional H&S Committee. The committee will continue its' outreach efforts to ensure we have full representation from all the Regional Components.

Just a friendly reminder again to all that the committee meets on the third (3rd) Wednesday of every month starting again on September 18, 2019. Please come out and join us! For the location of the meeting please refer to the PSAC regional website.

We encourage all components and DCL's to come out and join us and share new ideas and initiatives that you would like to see become part of the Committee's mandate.

Your PSAC Regional H&S Committee Executive,

Imre Bene
Anna-Marie Melanson
and Robert Basque
